

[Former Vodafone Boss Blows Whistle on 5G/Coronavirus](#)

April 02, 2020

LBRY Description: "In a 32-minute audio message posted on YouTube, an anonymous whistleblower claiming to be the former head of the largest business unit at Vodafone explains the correlation between the coronavirus and the rollout of 5G technology. In the second half of the message, he openly shares his views as a Christian pastor, quotes several scriptures and mentions his recent ministry activities."

Partial Transcript:

"I was the head of the largest unit at Vodafone; the headquarters in Newbury, between 2013 to 2015. I was privy to a number of the new technologies that were going down the pike, that was going to be implemented, namely the *internet of things* & secondly the 5G technology. I knew a long time ago that 5G was dangerous; I didn't understand the correlation with the coronavirus, which I now do.

What is happening: there is a deliberate strategy to rollout 5G, which is the 5th generation internet, radio spectrum frequencies that enable mobile phones, smart phones, & all devices to function... With the introduction of AI, *artificial intelligence*, & the *internet of things*, where all devices will be connected, whether it's your car, your phone, refrigerator, electricity in your house—it's all going to be on a smart grid—effectively a type of matrix.

So what is happening is that this technology has to be rolled out globally. My company, that I used to work for, running the largest worldwide business unit, is Vodafone. Vodafone are in partnership with Huawei (pronounced either Hoo-Way or Hi-Way) or whatever you call them—the Chinese telecom company—and they have been rolling out systematic 5G implementation in multiple locations.

The 5G frequency is a ... very high frequency. It's just below the classification of a weapon. And I'll tell you why. The frequency that they are using, which is 10 times faster than 4G, unfortunately when it is [in contact] with human bodies causes cell poisoning—cell poisoning. So our bodies try to fight the radiation, that is in the form of cell poisoning because of this frequency, that is effectively radiation.

What happens is our bodies kick out the toxins, with some proteins & some DNA & RNA, from our cells, in the form of a chemical which is called a virus. Most diseases are excretions from cells that we are trying to ... push out of our body. It will head toward orifices to be excreted or expunged out of our body.

What is happening is that 5G, the frequency & the power, which is 10 times more powerful than 4G, is reacting adversely with human cells; causing cells in our bodies to be poisoned, toxic, & our natural defense mechanism is pushing out that toxicity in the form of a virus. So what you're seeing is not coronavirus per say, you're seeing cell poisoning manifesting with fluids, chemicals, viruses that the body is trying to dispose of... So, all this occurring around the world ... all that's occurring in the world is a reaction [of] human bodies to the electrification of the universe through 5G satellites, 5G towers, 5G cell phones that are being populated in major cities around the world. So this is what is causing this pandemic.

This is the largest global coverup in history for the impact [on] human beings based on technological advancements. What is happening is not the coronavirus; it is a virus that is being produced by cell poisoning, & therefore the virus that we have is really a measure ... of our cells excreting toxins. This is what's killing people.

One of the first cities that Vodafone, Huawei, & some of the other technology companies rolled out ubiquitous, blanket 5G, guess where it was? Wuhan, China, where this coronavirus was supposedly meant to start in some fish market. That is complete nonsense. It started as a result of radioactive or radio frequencies that are high-level, creating radiation that was toxic to cells. That's why people were falling over, dying in the streets. So they've tried to cover it up. So, because it has a flu-type characteristics, they are using coronavirus to try & hide the fact that people are dying from the 5G frequency.

Other major cities that rolled this out—it takes 6 months for this to impact your physical body. So, last year, obviously Wuhan was the first city, then Spain rolled out 5G, Italy rolled out 5G. So you're seeing an uncommon level of fatalities because of the level of 5G [proliferation] in these countries. Italy has had more fatalities than any other country because it is densely populated with 5G & the older generation doesn't have the immune system to fight against it. ... So Italy has rolled it out, Spain has rolled it out, most major cities have rolled it out & countries. London is one of the biggest CCTV centers & obviously they're in the process of rolling out more 5G.

The relevance is the coronavirus is not what's killing people. It is ... unequivocally & scientifically proven that the radio frequencies that we are being exposed to is what's killing the people."

You're seeing in the news now that people without underlying health issues or compromised immune systems are falling sick & dying of corona. That makes no sense that the others are dying. The reason they are dying—the facts are, the truth is—that the radiation does not compromise, has no prejudice, young or old you will [fall] to the power of radiation. This is the fact of what's really occurring."

So, why are they doing this? We know the technological reasons. They need a robust, scalable, fast internet that can handle the petadata of information about all of your movements, all your travels, your identification, all CCTV cameras around the world, etcetera, because they need visibility on what everyone's doing.

They are implementing three new strategies. One, vaccines. Vaccines have in them toxins, that give you the actual disease. ... So, they give you the disease. In that vaccine will consist chemicals that light you up effectively to respond even more powerfully to the signals. So, it's a bit like chemotherapy. ... That enables the cells to be destroyed. That vaccine will consist of a substance that will enable the frequency of 5G to be more effective in creating more fatalities.

Secondly, the vaccines will [have] a tracking device called an RFID chip. It will be a microchip that will be inserted at the same time of the vaccine; they will be subtle about it. ... This will give them the ability to track people in the name of 'we need to know who has had vaccines, who hasn't had vaccines, so we can know who's safe & is not safe, & who can be given license to travel & do different things on the basis that they're no longer a threat to humanity...'"

The third area is the ... implementation of digital currency—a global digital currency that starts in the US & it will roll out around the world. ... They are expediting rapidly because they realize there is a level of esoteric enlightenment going through the Earth; there's a level of technology that can fast-track other people's agendas which would be contrary to theirs; & they want to shut it down. So what are they doing systematically & simultaneously? They are shutting down global economies down because they want to introduce two things: a new level of monopoly or oligopolies. These are 4 or 5G multinational companies; Amazon will be the first, Google is obviously one.

There will be others that will manage the supply chain of everything that we purchase. So, everything is going to be streamlined from food, to electronics, the flow of money—everything. So, the second thing they're doing with this system, other than creating these oligopolies, they shut the global markets down for that. They want to make as many people as possible unemployed. So, please do not believe these measures they're talking about, about stipends & grants, or payments to help self-employed or people who've been made [unemployed]. It's not going to happen to any degree that's going to affect the livelihood of people.

We're heading for the largest global recession the world has ever seen, because they are changing the [system]. ... They are bringing in the new system, the new blockchain global digital currency, which we will not have access to unless we can prove that we are no longer harmful to humanity by having the vaccines, which will be mandatory. They will force them on us. ... They will insist that we have to take the chip that is part of that same simultaneous process.

Why are they shutting global economies down? Because they want to take control back from entrepreneurs; take control back from family offices, family businesses. They want to completely [dismantle] the fabric of society as we know it; education, employment, everything will be completely different, in a matter of months, not even years. So, this is their strategy to ultimately control, in terms of visibility through technology, such as 5G the internet & all that gives them access to in terms of the internet of things, & the control of money.

There's been a ubiquitous shutdown of worship & prayer & congregating of religious organizations... When we pray, when we worship [collectively] we create a frequency. We create vibrations. We create a Mood of God—we call it the Fire of God, the Power of God, the Spirit of God. We as spirit-filled clean-living beings are generators of spiritual energy, spiritual power, might, ... anointing; these are electrical-magnetic frequencies that emanate from us. When we listen to, worship, & pray, it literally heals our body.

So, when we're in the presence of God—this is why we have healing as a byproduct because what we're exposed to physically heals our cells. ... Communication frequencies & information flows greater when we are ... praying corporately. And so they have deliberately shut that [down] & our network, spiritually... They systematically dismantled, for the first time in human history, the corporate gathering of religious people to pray & worship, because it changes the spiritual atmosphere...

Use this time to reset ... our priorities, reset our routine, reset our investment in ourselves, ready ourselves, re-invent ourselves if we have to. We have to reach out to other people. We need to share this information."
